

Training

VF006 Fidessa Market Access (EMMA) (2 Days)

About the Course

Fidessa European Multi-Market Access (EMMA) provides a single trading user interface for all multiple markets. The system allows entry, modification and deletion of orders via direct Fidessa exchange links. In addition it can also connect to other brokers worldwide via the Fidessa Express network.

The course covers the business functions, order flows and order types for the EMMA product and explains the technical architecture behind the system. It describes how EMMA communicates with the various exchanges it supports, and the way in which the server can be configured to work with the other members of the Fidessa suite of products. Hands-on exercises are used to illustrate the way the system works.

Course objectives

On completing the course, the delegate will be able to:

- Understand the business reasons for using EMMA
- Have a detailed understanding of the architecture of EMMA
- Implement links between EMMA and various exchanges
- Integrate the FDA with EMMA and the connected exchanges
- Understand the RTD data model used by EMMA
- Understand the functionality of the various EMMA server processes
- Configure an EMMA server system
- Configure the processes that communicate with other Fidessa products
- Design FTW worksheets using the EMMA Objects
