VF027 Introduction to Fidessa Sell-Side Products & Services (1 Day)

About the Course

The purpose of this course is to provide all people new to Fidessa with an overview of the Fidessa range or products and services, whether their role is technical, business or administration.

For technical people, this course is a pre-requisite to in depth technical courses.

For non-technical people, this course gives an overview in non-technical terms of how the Fidessa product range and infrastructure fulfils the business needs of our customers.

This is a one-day course that is relevant to both Enterprise and Hosted systems. Follow-up courses will provide experience appropriate to the system you will be working on be that technical or non-technical.

Technical people will also follow up with technical courses such as Infrastructure Part 1 and Part 2 and specialist courses on each of the product servers.

There is a hands-on element using a generic Fidessa system so that delegates can experience the order flow through a Fidessa system.

Course objectives

On completing the course, the delegate will be able to:

- understand what the Fidessa range of products and services are
- understand how Fidessa market data is used
- understand how Fidessa Global Connectivity is used
- understand how Fidessa Trading Platforms are used
- state the differences between the Enterprise, Hosted Enterprise, ETP and Workstation delivery models.
- appreciate how the core technology behind all Fidessa products safeguards our customers' data and businesses

Course Contents

- What is Fidessa
- Global Connectivity, Global Market Data
- Fidessa Trading Platforms
- Fidessa Product Components: PMAC, TMAR, OMAR, BEAM, APAS, FTW, CTAC, EMMA, Communications and Data.
- Trade and Order flow through Fidessa.

Who should attend

- This course is designed for both technical and non-technical staff.
- Non-technical staff such as managers and business analysts.
- Technical staff as a pre-requisite for further technical training such as the Fidessa Infrastructure Courses.

Course pre-requisites

- A basic knowledge of the concepts of markets and trading
