

F Fidessa Buy-side Workstation

Fidessa's Buy-side Workstation is ideal for any asset manager - from small hedge funds to larger institutional managers - requiring multi-asset class, broker-neutral connectivity and execution capabilities, along with integrated real-time market data. A fully hosted out-of-the-box solution, it is quick to deploy and works with any order management or portfolio management platform.

Information The Workstation provides a range of information and analytical services from markets, brokers and independents to help with the trading decision making process.

- Pre-trade, real-time and post-trade analytics
- Fragmentation analysis tools – Fidessa Fragmentation Index[®], Fragulator[®] and Tradalyzer[™]
- Research from brokers and independent sources
- Real-time integrated market data, news and charting
- Order book driven displays and desk overlays
- Indications of interest (IOIs) and trade adverts

Trading Comprehensive suite of trading tools designed to improve market interaction and liquidity seeking for equities, derivatives, FX and fixed income.

- Order management functions within the trading platform
- Connectivity to 175 global markets
- Broker services including DMA, care, algo, pairs and program trading
- Direct access to trading hubs, aggregators and dark pools
- Liquidity seeking tools, dark pools, RFQ and RFS functions
- Performance management and benchmarking
- Full compliance mode, counterparty restriction handling and risk limits
- Counterparty flow analysis

Connectivity A suite of tools gives the buy-side complete control over connectivity including electronic order processing, flow analysis and FIX customisation. The Workstation provides access to over 700 brokers and 175 global markets.

- Fully hosted access to the Fidessa FIX network
- Full suite of connectivity tools with FIX and .NET interfaces
- Connection monitoring and flow analysis
- Automated FIX testing engines
- FIX customisation tools
- Pre-configured interfaces to all leading OMS platforms

The only screen a buy-side trader needs!
